MySQL to Access loaded on new Dell PC-1 9/6/23

Intelligent Converters Install Process Windows 11

9/5/23 installed on Dell PCs.

If this program is a problem just purchase a new one.

Mysql upload from Access to website, Run the installer in this folder.

Z:\Computer\ES Systems\Mysql\1- YES DELL 9-6-23 & mysql NEW Intelligent Converters Installed 7-16-21\Dell PC install Intelligent Converter Mysql 9-5-23

After installed replace with the file that has been patched by Intelligent Converters located in file located below. Must run this program that was renamed that includes the patch. We are dealing with an issue where on the new machine the MySQL table that is being created uses field sizes that are too large. The patch fixes this by Intelligent Converters. Its creating Varchar(510) fields, instead of varchar (255) fields.

File Name: a2sagent.ext

Z:\Computer\ES Systems\Mysql\mysql NEW Intelligent Converters Installed 7-16-21\Dell PC install 9-5-23

Create a temp folder on c drive c\temp on the local machine

Now MySQL upload will work from Access to Website.
